IHCA Launches New Website

Springfield – The Illinois Health Care Association (IHCA) today announced the launch of its new, redesigned website, www.ihca.com. The goal is to offer a streamlined website that is contemporary-looking, informational, and easy to navigate.

The new website features the latest news about IHCA and the long term care profession, as well as current association events. Although members of the association will have access to a password-protected section, most of the website is open to the public.

The new website features a comprehensive Education section that includes convention and trade show information, seminars listings, and a look-up page for continuing education (CEs). The “Business Resources” section details IHCA’s preferred vendors, along with a handy classifieds page.

Consumers who are looking for a long term care facility in their region can search an interactive map for detailed descriptions of IHCA-member facilities. In addition, IHCA has created a new Facebook page that contains a wealth of helpful material.

“Our hope is that people will find our redesigned website to be a helpful resource,” said IHCA Executive Director David Voepel. “We are committed to meeting the needs of our members, and this website will provide them with up-to-the-minute information about IHCA and long term care.”

###

Founded in 1950, the Illinois Health Care Association is a non-profit organization comprised of more than 370 licensed and certified long term care facilities and programs throughout the state. IHCA seeks to promote the highest standard of services in facilities and programs for the elderly and physically and mentally challenged.
