**Understanding the Complicated Long Term Care Survey Process**

**Seminar Purpose**

Today there are many more surveys that are becoming part of the Long Term Care Landscape. Aside from MAC, RAC, ZPICs and the like, we now have focus surveys. These focus surveys include the original one that involved ADLs, care plans, and MDS coding. Added to that is dementia focus surveys, and the latest, the antipsychotic medication focus survey. And let’s not forget the HFS surveys and ADRs that Medicare keeps requesting.

In all instances, money can be lost, either in returns to Medicare or Medicaid, or in citations and civil monetary fines. This session will help members of the interdisciplinary team prepare for these surveys.

Upon completion of this seminar, participants will be able to:

1. Explain the various reviews to which your facility may/will be subjected.
2. Discuss what each type of reviewer will be looking at while in your facility.
3. Explain how to prepare for each of these reviews.
